

## Mobile Software

Friday, 19 December 2008

Last Updated Sunday, 04 January 2009

Mobile software by Softabar.

Development in progress.

Mobile software is currently "a hobby" and they are free with no support or anything. Software is also development software so that version that can be downloaded may not even work.

Currently only mobile software is Conway's Game of Life J2ME midlet.

JAD file: [SoftabarGameOfLife.jad](#).

JAR file: [SoftabarGameOfLife.jar](#).

If you have any comments, ideas, suggestions, etc. please us mobile software forum .
